DETAILED ACTION

Allowable Subject Matter

1. Claims 1, 3-9, 11-13, 15-17 and 19-20 are allowed.
2. The following is an examiner's statement of reasons for allowance:

None of the prior art teaches or suggests a clock signal recovery circuit in a USB comprising: a phase detector for detecting a phase difference between data received from a USB transmitter and a recovery clock signal and generating a first control signal indicative of a detected phase difference; a bidirectional shift register for outputting a second control signal in response to the first control signal; a multiphase clock signal generator for processing a receiver clock signal of the USB receiver, wherein the receiver clock signal is the same as a transmitter clock signal of the USB transmitter, generate a plurality of phase clock signals each having the same frequency as the receiver clock signal and a different phase offset from the phase of the receiver clock signal; and a phase selector responsive to the second control signal for selecting one of the plurality of phase clock signals and outputting the selected phase clock signal as a recovery clock signal, wherein the plurality of phase clock signals comprise first through N-th phase clock signals, wherein the different phase offsets of the first through N-th phase clock signals are about $(360/N)I$ degrees, where N is an integers and I is an integer equal to or greater than 0 and equal to or less than N- 1.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably

accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
